

## CATCH SENSORS

The CS30 Catch Sensor is a ruggedly built device that has all the features you have been asking for — and more!

### FEATURES:

#### UNMATCHED FLEXIBILITY

- A Magnetic switch allows you to change the number at sea.
- Number selection visible on LED readout through clear polyurethane. Carry one as a spare and set it to the number you require when needed.
- WESMAR CS30 Catch Sensors are compatible with any 70 kHz head rope unit from manufacturers such as Simrad, Furuno, Marport and Scanmar.
- Backward compatible – mix and match with WESMAR's model CS20.

#### IMPROVED DURABILITY

- Designed and manufactured for the tough commercial fishing environment.
- Corrosion prone charging pins have been replaced with a galvanically balanced design for longer life.
- The marine grade stainless steel carrier housing is a much heavier gauge highly resistant to deformation.

#### EXTENDED RUN TIME

- Spring-loaded locking pins for easy utilization with gloved hands – no tools required.
- Lightweight - Sensor: 8.5 lbs., Carrier: 9 lbs., Combined: 17.5 lbs.
- CS30 Carrier stays on the net for fast and reliable deployment.

#### UPGRADED CHARGING SYSTEM

- CS30 units are charged using an all-new Integrated Smart Docking Station.
- Difficult to manipulate alligator clips have been upgraded to a simple drop in system.
- Mechanical restraints ensure sensors stay safe in the docking station even in the roughest seas.
- Real time digital display of charge state and battery condition – no need to guess if units are fully charged.
- Daisy chain up to six charge stations for simultaneous charging of multiple units. Only one AC outlet is required.

The electronics and battery of the CS30 are sealed within an inner container that can be easily serviced at the factory. This means faster turn-around if your equipment is damaged and needs repair.

Daisy chain up to six charge stations to keep your nets loaded and in full production. The CS30's have a battery run time of up to 4 weeks between charges.

## SMART DOCKING!

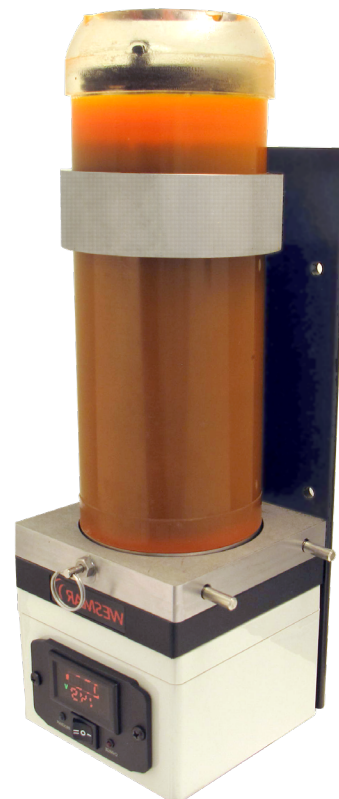

Positive contact charging with galvanically balanced design and no corrosion prone charging pins means more reliability at sea.

Not included  
with charger

## DAISY CHAIN UP TO 6 CHARGE STATIONS

Daisy chain up to six charge stations for simultaneous charging of multiple units. Only one AC outlet is required.
